DETAILED ACTION

The following is an examiner's statement of reasons for allowance: With respect to claims 2, and 19, the Prior Art does not teach an apparatus for producing tractive effort, said apparatus comprising: an energy source adapted for generating a high DC voltage; a motor drive adapted for generating a motor voltage from said high DC voltage; and a motor adapted for producing said tractive effort from said motor voltage, said energy source comprising: a heat engine adapted for generating mechanical power by burning a fuel; an alternator adapted for generating an alternating voltage from said mechanical power; a rectifier adapted for rectifying said alternating voltage and producing a low DC voltage; an energy battery adapted for storing and delivering energy derived from said low DC voltage; and a traction boost converter adapted for boosting said low DC voltage to produce said high DC voltage, said motor drive comprising: a power battery adapted for storing energy and delivering power at said high DC voltage; and a traction converter adapted for generating said motor voltage from said high DC voltage during motoring operation and for generating said high DC voltage from said motor voltage during braking operation; herein a ratio of the energy storage capacity of said motor drive to the power delivered by said energy source at said high DC voltage is between 0.001 hours and 60 hours.

With respect to claims 71, and 76, the Prior Art does not teach An apparatus, comprising: a first battery electrically coupled to an AC/DC rectifier and that is capable of receiving, storing, or receiving and storing a first direct current at a first voltage; a boost converter electrically coupled to the first battery and that is capable of boosting

the first voltage to a second voltage that is a relatively higher voltage than the first voltage; and a second battery electrically coupled to the boost converter, and that is capable of receiving, storing, or receiving and storing the second voltage; and further comprising a an electric utility grid converter coupled to the first battery and that is capable of charging at least one of the first battery or the second battery from an electric utility grid. Claims 2-17, 19-34, and 71-76 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
